Equipment:

DMT can refurbish high end printers of many makes and models, returning them to original OEM specifications. This process consists of several steps, a sample of which is highlighted here. Once refurbished, our equipment is sold directly to end users or to equipment brokers who in turn place the gear with their customers.

### DMT GUARANTEE

If the customer desires, Used Equipment can be reconditioned and certified eligible to go under OEM Service. For a complete list of products, please [click here](#).

Operator Training:

Originally founded by a Print Manager and Field Engineer with a degree in electronics, DMT Stands out as a model for other businesses to compete in todays lower margin printing. DMT has an open-minded approach to solving customer's work flow issues. Since we are in the printing business, DMT can recommend the best software and work flow to fit the customer's needs. We can help the operator with file submission and proگرامing of customers jobs to make the process more understandable.

Technical Support / Training:

Whether you currently maintain your own equipment or would like to explore the possibilities, DMT can assist you make printing more cost effective without the need to rely on the OEM to maintain your financial lifeblood. Our technicians can back you up during the learning curve or on vacations. DMT can train your techs (starting with the basics) in our facility or yours. Find out the details [here](#).
